Instructions for Fabric

Dirt has an effect on the fire-retarding properties of the materials, so it is very important to regularly clean fabrics so dirt cannot be absorbed by the material. Wee advise the weekly care of upholstery fabrics by vacuum cleaning. Remove stains as soon as possible. You can immediately remove most stains by dabbing the dirt with an absorbent cloth. you can then let the dirt dry and vacuum it up, if this is not sufficient carefully treat the stain with a cloth that does not give off and luke warm water. If necessary use a cleaning agent suitable for the material concerned. Take advice on this.
Water does not affect the fire-retarding properties because this property is present in the yarns and is not added by finishing. You can wash or treat the fabrics with warm water. The fabrics dry quickly and do not lose their shape.
