Description

BAM! is a sofa reduced to its basic geometry with two block-shaped volumes creating a seat and back. The design has clear influences from Pop Art culture, and as the name suggests, the sofa leaves the spectator with a sudden and distinct first impression.

The legs come upholstered in the same textile as the seat and back. Both its design and supporting function draw their inspiration from Gothic buttresses.

The included cushions are filled with recycled goose and duck feathers from old down products. One of the cushions has been designed with details of a black large embroidered patch with the text BAM!, a nod to the American artist Roy Lichenstein.

BAM! is delivered disassembled in flat packages, for a climate-smart transport. The flat packages are also easy to transport and assemble, where a few components are connected with a smart wedge fitting.

Instructions for Fabric

Vacuum frequently, ideally every week, at half power where appropriate. Wipe upholstery fabrics made from polyurethane with a dry or moist cloth. May also be vacuum cleaned with a soft brush. For stain removal first, scrape off any liquids or hardened residues with a spoon or a scoop before you proceed. Any loose particles must be vacuum leaned before further cleaning. Liquids must be soaked up with an absorbent napkin or cloth. Remove non-greasy stains by carefully dabbing with a lintfree cloth or sponge wrung out in warm water. Edge marks can be avoided by dabbing gently in circular motions towards the centre of the stain with a clean lint-free cloth. Remove greasy stains by using appropriate detergents or solvents. In all cases, we recommend to test stain-removal agents on an inconspicuous area first, to see if there is any effect on the cover. Make sure to dry the fabric fully before use. It may also be necessary to use a hairdryer to avoid leaving edge marks. This applies especially to microfibre textiles. These tips are purely recommendations and cannot guarantee complete stain removal. In all cases, we recommend contacting a professional dry cleaning. Warning – do not rub the material hard because this could result in loss of colour or potentially damage the nap. Be careful when using solvents; these could dissolve the upholstery materials beneath. Never use un-concentrated detergents or bleach, ammonia or soap intended for hard surfaces. It is usually recommended that upholstered furniture with normal commercial use should be cleaned 2–3 times a year. Upholsteries in private households usually need less frequent cleaning. For more information see our website. Removing stains from textiles in the Divina family can be difficult, as the fabric is being pressed after fulling in order to achieve the felt-like surface. Particularly on new woollen covers, the fibres will slightly rise when the fabric becomes moist. The moist area will appear as a darker stain. The textile cannot be pressed again, however, it is possible to reduce the discoloration by spraying water over the entire furniture piece. When using the furniture and at normal humidity levels, the wool fibres will rise and potential stains will become less visible.
