Description

BAM! is a sofa reduced to its basic geometry with two block-shaped volumes creating a seat and back. The design has clear influences from Pop Art culture, and as the name suggests, the sofa leaves the spectator with a sudden and distinct first impression.

The legs come upholstered in the same textile as the seat and back. Both its design and supporting function draw their inspiration from Gothic buttresses.

The included cushions are filled with recycled goose and duck feathers from old down products. One of the cushions has been designed with details of a black large embroidered patch with the text BAM!, a nod to the American artist Roy Lichenstein.

BAM! is delivered disassembled in flat packages, for a climate-smart transport. The flat packages are also easy to transport and assemble, where a few components are connected with a smart wedge fitting.
