Finish

Grey

## Specifications

---

Width: 170 mm

---

Depth: 48 mm

---

Height: 210 mm

## Information

---

Designer: Chris Martin

## Description

Universal Door Wedge is a sculptural and geometric rubber door wedge that's designed for easy handling and good functionality and is part of Massproductions' new collection "The Little Things". The design and product development of the Universal Door Wedge took over 1 year and an important time-consuming part in this process has been to create the perfect solution for different doors, whose gap between the door and floor can vary from 5mm to 5 cm. Due to its double wedge-shaped sides, the Universal Door Wedge accommodates most doors, as its name suggests!
