Information

Designer: Chris Martin

Description

Memory Mirror, a series of mirrors in polished stainless steel. The mirrors are characterized by their curved, reflective sides and useful hanging knob. Memory Mirror is part of Massproductions' "The Little Things" collection.

The mirror has a thickness of 3cm which gives it an elegant distance from the wall. The mirrors are secured to the wall with a useful knob for hanging scarves.

Memory mirrors are manufactured in Italy and diamond polished to achieve a maximum reflective surface. The mirror is available in three sizes.
