Through a lifecycle analysis with a focus on mass and energy the CO2 emissions from the production has been calculated to 4.759062 KG of CO2. Read more in our Transparency Page.

Lead time 6 weeks.

Instructions

For metal surfaces: Rinse with large quantities of water. Clean with wetting agent solution and use a sponge or soft cloth. Post-rinsing and drying. Specific instructions based on type of soiling: Greasy film can be removed with a concentrated wetting agent solution, alcohol or surfactant, after allowing the solution some time to break down the film before removing. Unidentifiable, stubborn dirt can be treated with facade cleaner (e.g., Ambruch2 www. ambruch.de) or Power Wipes www.interflon. net. Note: The specific methods listed here should be tested accordingly for possible damage to the surface.
