Upholstered seat (optional)

Fabric Supplier

Specifications

Width: 380 mm

Depth: 380 mm

Weight: 6 kg

Seat Height: 740 mm

Information

Designer: Chris Martin

Year: 2010

Description

A sturdy piece of furniture with legs that widen toward the footrest. Albert is a refined version of the iconic English pub stool which inspired it.

Through a lifecycle analysis with a focus on mass and energy the CO2 emissions from the production has been calculated to being carbon neutral, or more specifically - 0.1843 KG of CO2. Read more in our [Transparency Page](#).

Lead time 6 weeks.

Instructions

For cleaning of wooden surfaces, advantageously use a detergent, or mild pH neutral detergent and lukewarm water in a well wrung cloth. Then wipe off with clean water and wipe dry. To preserve the look and finish you should be aware not to use: – Alkaline or aggressive cleaners, – Solvent – Preparations containing abrasives, – Abrasive tools. Remember not to let the cleaners or other liquids on the surface for long. For furniture and surfaces for use in public spaces, it is also important to remember not to use disinfectants that contain a high concentration of alcohol or alkaline substances, such as 70% alcohol. There are disinfectants that can be advantageously used, but that does not affect the painted / varnished surface appreciably. Note that freshly painted surfaces are susceptible to scratching. Surface final resistance is only achieved after about a month. Tape and other foreign substances such as, for example, adhesive and moisturizers can soften the treated surface and cause peeling / paint drop. For cleaning of the fabric/leather, see instructions related to the specific fabric/leather in use.

Instructions for Fabric

Dirt has an effect on the fire-retarding properties of the materials, so it is very important to regularly clean fabrics so dirt cannot be absorbed by the material. We advise the weekly care of upholstery fabrics by vacuum cleaning. Remove stains as soon as possible. You can immediately remove most stains by dabbing the dirt with an absorbent cloth. you can then let the dirt dry and vacuum it up, if this is not sufficient carefully treat the stain with a cloth that does not give off and luke warm water. If necessary use a cleaning agent suitable for the material concerned. Take advice on this.

Water does not affect the fire-retarding properties because this property is present in the yarns and is not added by finishing. You can wash or treat the fabrics with warm water. The fabrics dry quickly and do not lose their shape.
