

JIG ARMCHAIR

Jig Armchair

Color

White - RAL 9003

Fabric Supplier

Specifications

Width: 540 mm

Depth: 490 mm

Weight: 7 kg

Height: 795 mm

Seat Height: 450 mm

Information

Year: 2012

Description

Jig is a lightweight, robust and stackable armchair for commercial spaces and hospitality areas. It's made from twelve simple steel tubes that are joined together in a fresh design for an old typology.

Lead time 24 weeks.

Instructions

For cleaning of metal surfaces: Rinse with large quantities of water. Clean with wetting agent solution and use a sponge or soft cloth. Post-rinsing and drying. Specific instructions based on type of soiling: Greasy film can be removed with a concentrated wetting agent solution, alcohol or surfactant, after allowing the solution some time to break down the film before removing. Unidentifiable, stubborn dirt can be treated with facade cleaner (e.g., Ambruch2 www.ambruch.de) or Power Wipes www.interflon.net. Note: Special care should be taken with coatings that have a metallic, pearl mica or matte effect. The specific methods listed here should be tested accordingly for possible damage to the surface. For cleaning of the fabric/leather, see instructions related to the specific fabric/leather in use.

Instructions for Fabric

One of the best ways to keep Sunbrella fabrics looking good and to delay the need for deep or vigorous cleanings is to hose fabrics off on a monthly basis with clear water. This practice will help prevent dirt from becoming deeply embedded in the fabric and eliminate the need for more frequent vigorous cleanings. In most environments, a thorough cleaning will be needed every two to three years. When it's time for a thorough cleaning, Sunbrella fabrics can be cleaned in a washing machine if they can be removed. When cleaning Sunbrella fabrics, it is important to observe the following: Always use a natural soap. Never detergent. Water should be cold to lukewarm. Never more than 100 degrees. Air dry only. Never apply heat to Sunbrella fabrics.
