Information

Year: 2012

Description

Jig is a lightweight, robust and stackable armchair for commercial spaces and hospitality areas. It's made from twelve simple steel tubes that are joined together in a fresh design for an old typology.

Lead time 24 weeks.

Instructions

For cleaning of metal surfaces: Rinse with large quantities of water. Clean with wetting agent solution and use a sponge or soft cloth. Post-rinsing and drying. Specific instructions based on type of soiling: Greasy film can be removed with a concentrated wetting agent solution, alcohol or surfactant, after allowing the solution some time to break down the film before removing. Unidentifiable, stubborn dirt can be treated with facade cleaner (e.g., Ambruch2 www. ambruch.de) or Power Wipes www.interflon. net. Note: Special care should be taken with coatings that have a metallic, pearl mica or matte effect. The specific methods listed here should be tested accordingly for possible damage to the surface. For cleaning of the fabric/leather, see instructions related to the specific fabric/leather in use.
