Specifications

Width: 540 mm

Depth: 490 mm

Weight: 7 kg

Height: 795 mm

Seat Height: 450 mm

Information

Year: 2012

Description

Jig is a lightweight, robust and stackable armchair for commercial spaces and hospitality areas. It's made from twelve simple steel tubes that are joined together in a fresh design for an old typology.

Lead time 24 weeks.

Instructions

For cleaning of metal surfaces: Rinse with large quantities of water. Clean with wetting agent solution and use a sponge or soft cloth. Post-rinsing and drying. Specific instructions based on type of soiling: Greasy film can be removed with a concentrated wetting agent solution, alcohol or surfactant, after allowing the solution some time to break down the film before removing. Unidentifiable, stubborn dirt can be treated with facade cleaner (e.g., Ambruch2 www. ambruch.de) or Power Wipes www.interflon. net. Note: Special care should be taken with coatings that have a metallic, pearl mica or matte effect. The specific methods listed here should be tested accordingly for possible damage to the surface. For cleaning of the fabric/leather, see instructions related to the specific fabric/leather in use.

Instructions for Fabric

Leather is a living material that matures beautifully if treated properly. You should therefore consider the following:
Never place leather furniture closer than 20-30 cm to a radiator or in direct sunlight.
Vacuum clean leather often with a soft brush and, when necessary, clean any exposed surfaces, such as armrests and headrests. For stains that are water-soluble, dampen the area and dry using a paper towel.
If you should get a stain that cannot be removed, never experiment with strong solvents or chemicals. The problem could get worse, needing to be repaired: instead return to the store from which you purchased the furniture and ask for advice. If the staff cannot answer, ask them to contact the manufacturer for the correct advice.
For you to be able to take the best possible care of your leather furniture, Elmo has developed a water-based leather care programme with a cleaning (leather cleaner) and a protective (leather protection) component.
